- Modern JavaScript ES6
- JavaScript Debugging Tips for Beginners

## PROJECT

### E-commerce website for algriculture product

Created an agriculture e-commerce site with user registration and OTP authentication. Implemented JWT token-based login. Users can browse, purchase products, manage their cart, and make payments via Razorpay. show order details when payment is successful. Utilized React JS for frontend, Express JS for backend APIs, and MongoDB as the database.

### Stationery Management App

I develop applications to manage stock in companies and other places. I'm using the PHP REST API, MYSQL database and Flutter for this application. I created an API using PHP for the store categories, products, and user data.

### Alumni Portal

Made Alumni Portal by using HTML, CSS, JavaScript and PHP which can be used to access details of alumni students and make connections with them. User can signup, login and can even make the payment for alumni fees using payment gateway integrated in our application.
